Art Unit: 2611

## **DETAILED ACTION**

#### **Drawings**

1. The drawings are objected to because there are no labels or units for the vertical axis or the horizontal axis of the graphs in figures 4, 5, and 6. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Application/Control Number: 10/791,924 Page 3

Art Unit: 2611

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-10, 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

#### (1) Regarding claim 1:

Claim 1 is an apparatus claim reciting a bit-edge zero forcing equalizer.

Line 8 of claim 1 recites "a pulse modified by the filter and a communication channel". A pulse is a signal and does not fall within a statutory category of invention and it is not a component of the equalizer.

#### (2) Regarding claim 17:

Claim 17 depends on claim 16. Claim 16 recites "wherein the shaping of the pulse results in a modified pulse that has zero crossings located substantially at bit edges of each bit period within the sequence of bit periods". Then in claim 17, it recites, "the shaping of the pulse results in the modified pulse that has zero crossings located substantially at bit edges of each bit period within the sequence of bit periods except those bit edges immediately adjacent to the bit period in which the pulse is substantially located." The limitation in claim 17 is contradicting the limitation in claim 16.

#### Allowable Subject Matter

3. Claims 11-15, 16, 18-20 are allowed.

#### Conclusion

Application/Control Number: 10/791,924 Page 4

Art Unit: 2611

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yu (US 5,517,527) discloses an adaptive equalizer for ISDN U-interface transceiver. Mahant-Shetti et al. (US 6,058,404) discloses an apparatus and method for a class of IIR/FIR filters. McCarty (US 6,628,728 B1) discloses a Nyquist filter and method. Bergmans et al. (US 7,110,448 B2) discloses a ZF-based adaptive asynchronous receiver.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Siu M. Lee whose telephone number is (571) 270-1083. The examiner can normally be reached on Mon-Fri, 7:30-4:00 with every other Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chieh Fan can be reached on (571) 272-3042. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/791,924
